

STENNER PUMPS®

STENNER CATALOG

STENNER PUMP ADVANTAGES

- ▶ Self-priming
- ▶ Can inject off-gassing solutions
- ▶ Simple tube replacement
- ▶ 3 point roller assists anti-siphoning
- ▶ Output reproducibility
- ▶ Output volume not affected by back pressure
- ▶ Tube lubrication not required
- ▶ No vapor lock or loss of prime
- ▶ Foot valve not required to prime

Quick Facts

CLASSIC 45

- Single head, adjustable or fixed output
- Up to 22.0 gpd @ 100 psi max.
Up to 50.0 gpd @ 25 psi max.
- 26 rpm
- Model 45 pump prefix begins with 45

CLASSIC 85

- Single head, adjustable or fixed output
- Up to 40.0 gpd @ 100 psi max.
Up to 85.0 gpd @ 25 psi max.
- 44 rpm
- Model 85 pump prefix begins with 85

CLASSIC 100

- Double head, adjustable or fixed output
- Up to 20.0 gpd @ 100 psi max.
Up to 100.0 gpd @ 25 psi max.
- 26 rpm
- Model 100 pump prefix begins with 100

CLASSIC 170

- Double head, adjustable or fixed output
- Up to 34.0 gpd @ 100 psi max.
Up to 170.0 gpd @ 25 psi max.
- 44 rpm
- Model 170 pump prefix begins with 170

Features

- Advantages of Stenner peristaltic pumps on Contents page
- Tube replacement without tools with patented QuickPro® pump head
- Adjustable models:
 - External adjustable dial ring on feed rate control
 - 20:1 turndown, 2.5% increments
- Single head models:
 - Available as Tank System; ships pre-assembled for quick installation
 - Fixed output pump can be utilized for proportional injection, refer to pages 54-55
- Components are interchangeable between models

Versatile and Time-Tested

For over 65 years, the versatile peristaltic Classic Series remains a popular choice with installers. The pump is easy to service or convert to another model within the Classic Series. Injection can be directly into the water line. Pump can be activated by a pressure switch or controller.

CLASSIC SERIES

Weights and Dimensions

Single Head Adjustable Models

Shipping Weight 9 lbs (3.9 kg)

Box Dimensions

13 x 8 x 10 in. (33 x 20 x 24 cm)

Product Dimensions

Single Head Fixed Models

Shipping Weight 8 lbs (3.4 kg)

Box Dimensions

13 x 8 x 10 in. (33 x 20 x 24 cm)

Product Dimensions

Double Head Adjustable Models

Shipping Weight 10 lbs (4.5 kg)

Box Dimensions

18 x 8 x 10 in. (46 x 21 x 25 cm)

Product Dimensions

Double Head Fixed Models

Shipping Weight 10 lbs (4.1 kg)

Box Dimensions

18 x 8 x 10 in. (46 x 21 x 25 cm)

Product Dimensions

Accessories Shipped with Each Pump

3 Connecting Nuts 1/4" & 3 Ferrules 1/4" or 6 mm *Europe*
or 3 Connecting Nuts & 2 Adapters 3/8"

1 Injection Fitting 25 psi (1.7 bar) max.
or 1 Duckbill Check Valve 100 psi (6.9 bar) max.

1 Weighted Suction Line Strainer 1/4", 3/8" or 6 mm *Europe*
20' Suction/Discharge Tubing 1/4" or 3/8", white or UV black
or 20' Suction/Discharge Tubing, white, 6 mm *Europe*

1 Additional Pump Tube

2 Additional Latches

1 Mounting Bracket

1 Manual

NOTE: Double head pumps include another set of accessories listed above.

Specifications

Flow Rate Output Control

Adjustable model: External dial ring

Reproducibility $\pm 2\%$

Maximum Working Pressure

25 psi (1.7 bar); 100 psi (6.9 bar)

Maximum Operating Temperature 125°F (52°C)

Maximum Suction Lift

25 ft (7.6 m) vertical lift, based on water

Motor Type 1/30 HP, shaded pole, class B

Shaft rpm (average maximum) 26 or 44

Duty Cycle Continuous

Maximum Viscosity 1500 centipoise

Motor Voltage (Amp Draw)

120V 60Hz 1PH (1.7); 220V 60Hz 1PH (0.9);
230V 50Hz 1PH (0.9); 250V 50Hz 1PH (0.9)

Power Cord Type

120V 60Hz; 220V 60Hz SJTOW;
230V 50Hz; 250V 50Hz H05VV-F

Power Cord Plug End

120V 60Hz NEMA 5-15P; 220V 60Hz NEMA 6-15P;
230V 50Hz CEE7/7; 250V 50Hz CEE7/7

Power Cord Length 6 ft (1.8 m)

Classification Indoor and suitable for outdoor when installed with a Stenner Rain Roof part # MP90000

Materials of Construction

All Housings Polycarbonate

Pump Tube Santoprene® (FDA approved) or Versilon®

Check Valve Duckbill

Santoprene® (FDA approved) or Pellethane®

Pump Head Rollers Polyethylene

Roller Bushings Oil impregnated bronze

Suction/Discharge Tubing, Ferrules

Polyethylene (FDA approved)

Tube Fittings, Check Valve Fittings

PVC or Polypropylene (both NSF listed)

Connecting Nuts

PVC or Polypropylene (both NSF listed)

3/8" Adapter PVC or Polypropylene (both NSF listed)

Suction Line Strainer and Cap

PVC or Polypropylene (both NSF listed); ceramic weight

All Fasteners Stainless steel

Pump Head Latches Polypropylene

NOTE: Refer to Chemical Guide for material compatibility.

Agency Listings

- IAPMO Listed, conforms to standard NSF/ANSI 61 & 372 (excludes any model with a Versilon® tube).
- INTERTEK/ETL Sanitation Listed, Adjustable models conform to standard NSF/ANSI 50 (excludes any model with a Versilon® tube).
- INTERTEK/ETL Sanitation Listed, Fixed models conform to standard NSF/ANSI 50 only when used with standard NSF/ANSI 50 listed controllers.

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs. To reduce feed rate control wear, select the pump with a maximum flow rate output that most closely matches your application's maximum need.

Approximate output @ 60Hz									Approximate output @ 50Hz		

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs. To reduce feed rate control wear, select the pump with a maximum flow rate output that most closely matches your application's maximum need.

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

Quick Facts

- Variable speed with multiple modes of operation
- Up to 125.0 gpd @ 100 psi maximum
Up to 315.0 gpd @ 25 psi maximum
- Totally enclosed housing, NEMA 4X
- Leak detection
- Tube life timer
- Password protection
- Backup pump capability
- Indoor/Outdoor
- 2 year warranty
- S Series pump prefix begins with S30, S40 or S50

Quick Start in 5 Steps

1. ENTER pump max. flow rate output
2. CONFIGURE options
3. SELECT mode of operation
4. PROGRAM optional relays
5. RUN pump

Designed for Demanding Applications

The S Series metering pump is designed for demanding applications with a robust totally enclosed housing, built to the NEMA 4X standard. The pump has backup capability to seamlessly transfer operation from the primary to a backup pump when needed. With the OLED display on the control panel and the programmable output relays, an operator can monitor the performance status of the pump. The password protection prevents unauthorized access to the programmed settings.

The pump interfaces with process control systems utilizing a 4-20mA output signal and three programmable output relays. Applications include but are not limited to return wastewater treatment, additive injection in a manufacturing process, and liquid biocide injection in cooling towers. Program the pump for your application with the digital keypad. Select from nine modes of operation and several pump status indicators.

Features

- Advantages of Stenner peristaltic pumps on Contents page
- Brushless DC motor with ball bearing support
- Switch mode power supply
- Digital keypad with OLED display
- Modbus RTU over RS-485 capable (accessory required)
- Tank System ships pre-assembled (S30 & S40 models only)

9 Modes of Operation

- 4-20mA scalable, invertible
- 0-10VDC scalable, invertible
- Timer 7-day/24-event
- Pulse
- Hall Effect
- Cycle Timer
- PPM Feed flow switch
- PPM Feed hall effect
- Manual

Pump Status Indicators

The S Series has indicators to communicate the pump status. When a pump condition is recognized; it activates either a display alarm on the control panel or an output relay indication, or both. There are three programmable relays for output indication from the pump to a control system or to another pump or receptacle.

The chart below shows the pump status and indicators available per mode of operation.

Pump Status	Pump Status Indicators		Modes of Operation
	Display Alarm on control panel	Three Output Relays to pump, system or device	
Tube Change	✓	✓	All Modes of Operation
Tube Leak	✓	✓	
Standby	✓	✓	
Drive Fault	✓	✓	
Off	✓	✓	
Run	—	✓	
Mode Change	—	✓	
Transfer**	—	✓	
Repeat Pulse	—	✓	4-20mA*, 0-10VDC*, Pulse, Cycle Timer, Manual, Timer 7-day/24-event, PPM Feed flow switch

Backup Pump Capability

The S420 has backup pump capability to the primary pump to maintain operation in critical applications. When programmed, the primary pump transfers operation seamlessly to the backup pump.

HOW IT WORKS

The S420 variable speed metering pump injects solution in direct proportion to an incoming 4-20mA analog signal. To achieve the desired flow rate output, the operator scales the pump's response to the signal from 25% to 100% of the maximum flow rate output.

The ability to accept a 4-20mA signal makes the pump well suited for use with water treatment controls including pH and ORP monitors to maintain proper water chemistry and to treat effluent discharge water. Installations can include industrial and municipal wastewater treatment facilities and well or surface water treatment for municipalities who supply potable water to residential communities or commercial sites.

The chart illustrates the correlation between the signal received and the pump flow rate output based on the scale setting. When operating in manual mode, the adjustment range is 5% to 100%.

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

S FIXED

S VARIABLE

Quick Facts

- Backup pump capability
- Leak detection
- Totally enclosed housing, NEMA 4X
- Indoor/Outdoor
- Tube replacement without tools
- 2 year warranty

S FIXED

- Up to 60.0 gpd @ 100 psi max.
Up to 150.0 gpd @ 25 psi max.
- S Fixed pump prefix begins with S3F or S4F

S VARIABLE

- Up to 60.0 gpd @ 100 psi max.
Up to 150.0 gpd @ 25 psi max.
- S Variable pump prefix begins with S3V or S4V

HOW IT WORKS

The S Fixed and S Variable pumps are both activated by mains power or by a standby input.

S FIXED

Operates at one speed when power is applied, or the standby input is removed. Does not have an on/off switch.

S VARIABLE

Operates at a programmed speed when power is applied, or the standby input is removed.

Features

- Advantages of Stenner peristaltic pumps on Contents page
- LED pump status indicators
- Dedicated relays

S FIXED AND S VARIABLE SERIES

4 LED Pump Status Indicators

POWER	Solid green when mains power is connected.
LEAK	Blinking red when solution is present in the pump head.
RUN/FAULT	Solid green when pump is operating. Blinking red when pump has a drive fault.
STANDBY	S FIXED Solid red, pump is in standby when contact closure is on the standby inputs.
STANDBY/OFF	S VARIABLE Solid red, pump is in standby when a contact closure is on the standby inputs. Blinking red when potentiometer is set to standby setting  .

3 Dedicated Relays

LEAK DETECT

- Detects when solution is present in the pump head
- Red LED blinks
- Sends relay to indicate leak is detected
- Option to allow pump to continue to run

RUN

- Solid green LED
- Sends relay to indicate pump is operating

TRANSFER

Sends relay from primary pump to transfer operation to a backup pump if there is loss of power, a drive fault or a leak is detected.

S10P

Control Panel

Quick Facts

- Flow activated
- Up to 30.0 gpd @ 100 psi max., 10:1 turndown
- 4:1 turndown in 10 PPG mode
- Operating pressure to 100 psi max.
- Leak detection
- Totally enclosed housing
- Indoor/Outdoor
- Control panel with LCD display
- Tube replacement without tools
- 2 year warranty
- Advantages of Stenner peristaltic pumps on Contents page
- S10P pump prefix begins with S3P

Features

PUMP STATUS INDICATORS

Prime, Standby, Signal (excludes 10 PPG mode), Leak, Level, Change, Keypad Locked.

PERFORMANCE TIME MODES

Pump Life Hours

Registers the total run hours, not resettable.

Tube Run Hours

Total hours the tube has been in service.

Tube Change Hours

Set the desired hours for tube to run. When hours are exceeded, display flashes CHANGE, as a tube replacement reminder.

LEAK DETECTION

When a leak is detected, the pump stops and the display flashes LEAK. The dedicated relay can indicate to another device.

SIGNAL REPEATER

Dedicated relay replicates dry contact to another pump or device, for example, to link multiple pumps.

LEVEL INPUT

Utilized with a fluid level device in the solution tank. At low level, the dry contact is received on the level input, the pump stops and the display flashes LEVEL.

Modes of Operation

AUXILIARY (12-24 VAC/VDC signal)

- Runs at set speed while signal is received.
- Adjustable 10% to 100%, 1% increments.

FLOW SWITCH (dry contact)

- Runs at set speed while dry contact from 2-wire flow switch is received.
- Adjustable 10% to 100%, 1% increments.

SECONDS (dry contact)

- Runs at set amount of time for each pulse.
- Adjustable 0.1 to 60.0 seconds.

10 PPG (dry contact 10 PPG water meter)

- Runs at set flow rate output for each pulse.
- Adjustable 50% to 100%, 5% increments.
- For process flows from 0.1 to 14.0 GPM.
- Delivers steady solution distribution.

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

S128 Medicator

Control Panel

Quick Facts

- Injects 1 ounce of product into 1 gallon of water
- Up to 10.0 oz/min @ 60 psi max.
- Injects into system water flows up to 10 GPM
- 1 or 10 PPG and 1 PPL pulse settings
- Leak detection
- Built-in signal repeater
- Tube change timer
- Totally enclosed housing, NEMA 4X
- Indoor/Outdoor
- 2 year warranty
- S128 pump prefix begins with S4M

Speed Automatically Adjusts to the System Water Flow

The S128 is a peristaltic metering pump designed to proportionally inject at a 1:128 ratio of 1 ounce of product into 1 gallon of process water. Also known as a medicator, the pump has 3 speeds which automatically adjust the injection rate when the system water flow rate increases or decreases. The ability to respond to flow allows the pump to evenly distribute product into the water lines especially at low flow rates.

Activated by a dry contact pulse water meter, the pump injects into system water flow rates up to 10 gallons per minute. The flow rate output capacity is up to 10 ounces per minute with operating pressures up to 60 psi. The primary application is in livestock production such as chicken, turkey, ducks and swine.

LEAK DETECT can be set to stop the pump or let it run when a leak is detected.

TUBE TIMER can be set to a predetermined number of hours for the pump to run before the indicating it is time to replace the tube.

SIGNAL REPEATER is built-in and allows an existing water meter to register the total water volume to a controller.

Features

- Advantages of Stenner peristaltic pumps on Contents page
- Tube replacement without tools
- Flow responsive to evenly distribute product
- Proportional injection especially at low flow rates
- Remote start & stop capability using house controller
- LED pump status indicators
- Dedicated output relays
- Standby setting 
- Brushless DC motor with ball bearing support

ECON STENNICATOR

Potentiometer

ECON STENNICATOR Meter Systems - Single and Dual

ECON Tank System

[Watch Animated Video](#)

[Econ Stennicator on a Poultry Farm](#)

Quick Facts

- Injects 1 ounce of product into 1 gallon of water
- Up to 2.7 oz/min @ 80 psi max.
- 1 or 10 PPG and 1 PPL pulse settings
- Built-in signal repeater
- Econ Stennicator pump prefix begins with E20M

Compact and Water Meter Activated

The Econ Stennicator injects solution at a fixed ratio of 1:128. The pulse from the water meter activates the pump at a fixed run time to deliver the proper dosage. The pump has three pulse settings, adjustable with a potentiometer, to accommodate 1 or 10 pulses per gallon or 1 pulse per liter. The pump's relay repeats the incoming meter signal to another Stennicator, controller or device. Additional features include an on/off switch, prime and a standby setting.

Not a Traditional Medicator for Livestock Water

The Stennicator, Stenner's peristaltic medicator, is not a typical 1:128 water driven proportional pump. The pump injects directly into the water line eliminating a water bypass that can restrict water flow to the drinker lines. Poor water quality, scale and solids are not harmful to the pump.

The Stennicator is compact with a small footprint and can adapt to an existing pulse water meter. If utilizing a house controller, the pump's relay allows the water meter to send the signal to the controller to register the water consumption. The pump can accurately inject or be placed in standby, without interrupting the water meter signal.

Stennicator Meter System or Tank System

For convenient and quick installations or turnkey operations, the Econ Stennicator Meter System is equipped with the pump and corresponding dry contact 3/4" or 1" water meter mounted on a heavy duty panel.

The pre-assembled Tank System is equipped with the pump mounted to a 7.5, 15 or 30 gallon capacity tank. Select UV gray for outdoor installations or translucent white.

Features

- Advantages of Stenner peristaltic pumps on Contents page
- Tube replacement without tools
- Activate multiple pumps from one meter
- No water restriction or pressure loss
- Standby setting
- Brushless motor
- Enclosed housing
- Indoor/Outdoor

ECON INTEGRATOR™

Control Panel

ECON INTEGRATOR™ Meter System

ECON Tank System

Quick Facts

- Flow activated with internal repeater relay
- Up to 30.0 gpd @ 80 psi max.
- 10:1 turndown, 1% increments
- Digital keypad with LCD display
- Econ Integrator™ pump prefix begins with E10R or E20R

Proportional Pump with Repeater Relay

The Econ Integrator™ is a flow activated peristaltic pump featuring three operational modes and a repeater relay. The relay provides a dry contact output signal replicating the signal the pump receives. The signal output can control another device that accepts a dry contact signal such as another Econ Integrator™. Multiple pumps can be activated by one water meter. The relay is operable in the Seconds or Flow Switch mode.

In livestock operations, the relay is especially useful when an existing water meter is utilized to tally water consumption to a controller. The relay allows the meter to send a signal to the pump and to the controller; eliminating the need for another meter. The signal can be sent if the pump is operating or in standby.

Three Operating Modes

SECONDS The pump can accept a dry (non-voltage) contact signal and will run for a set **time** in response to receiving the signal. There are five pump operating time ranges; the maximum time is displayed on the control panel. The run time is adjustable from 10% to 100% in 1% increments.

1 second = 0.1-1.0 5 seconds = 0.5-5.0 10 seconds = 1.0-10.0
20 seconds = 2.0-20.0 60 seconds = 6.0-60.0

FLOW SWITCH The pump can accept a dry (non-voltage) contact signal from a 2-wire flow switch and will run at the set **speed** as long as it receives the dry contact. The pump speed is adjustable from 10% to 100% in 1% increments.

AUXILIARY The pump can accept a 12-24 VAC/VDC signal from control equipment that responds to flow and will run at a set **speed** for as long as it receives the signal. The pump speed is adjustable from 10% to 100% in 1% increments. The repeater relay does not work with a 12-24 VAC/VDC signal.

Econ Integrator™ Meter System or Tank System

For convenient and quick installations or turnkey operations, the Econ Integrator™ Meter System is equipped with the pump and corresponding dry contact 3/4" or 1" water meter mounted on a heavy duty panel.

The pre-assembled Tank System is equipped with the pump mounted to a 7.5, 15 or 30 gallon capacity tank. Select UV gray for outdoor installations or translucent white.

Accurate Low Volume Metering

The Econ LD is a reliable, compact variable speed peristaltic pump for precise injection as low as 0.04 oz/hr (1.3 mL/hr).

The design includes microprocessor technology, potentiometer, on/off setting and a totally enclosed housing. The flow rate outputs have a 50:1 turndown and are adjusted by the potentiometer.

Ideal for pumping flocculants, coagulants, anti-scalant, sanitizers and a variety of solutions.

ECON FP

Control Panel

ECON FP Meter System

ECON Tank System

Quick Facts

- Flow activated
- Up to 30.0 gpd @ 80 psi max.
- Digital keypad with LCD display
- 10:1 turndown, 1% increments
- Econ FP pump prefix begins with E10P or E20P

Flow Activated

The Econ FP is a flow activated peristaltic pump with three modes of operation. Based on the mode of operation selected, the pump runs at a set time or a set speed in response to receiving a signal. The control panel displays one of three operating modes: Seconds, Flow Switch or Auxiliary. The pump is designed for light duty applications such as drinking water disinfection or pH adjustment for private water wells in homes or farms.

Econ FP Meter System or Tank System

For convenient and quick installations or turnkey operations, the Econ FP Meter System is equipped with the pump and corresponding dry contact 3/4" or 1" water meter mounted on a heavy duty panel.

The pre-assembled Tank System is equipped with the pump mounted to a 7.5, 15 or 30 gallon capacity tank. Select UV gray for outdoor installations or translucent white.

Three Operating Modes

SECONDS The pump can accept a dry (non-voltage) contact signal and will run for a set **time** in response to receiving the signal. There are five pump operating time ranges; the maximum time is displayed on the control panel. The run time is adjustable from 10% to 100% in 1% increments.

1 second = 0.1-1.0 5 seconds = 0.5-5.0 10 seconds = 1.0-10.0
 20 seconds = 2.0-20.0 60 seconds = 6.0-60.0

FLOW SWITCH The pump can accept a dry (non-voltage) contact signal from a 2 wire flow switch and will run at the set **speed** as long as it receives the dry contact. The pump speed is adjustable from 10% to 100% in 1% increments.

AUXILIARY The pump can accept a 12-24 VAC/VDC signal from control equipment that responds to flow and will run at a set **speed** for as long as it receives the signal. The pump speed is adjustable from 10% to 100% in 1% increments.

Reliable Accurate Metering

Both the Econ VX and FX are peristaltic pumps designed with a totally enclosed brushed motor for light duty or general intermittent applications.

The pumps are wall mountable or select one of the optional mounting accessories. The Econ VX or FX is offered as a Tank System; the pump is shipped pre-mounted to a 7.5, 15 or 30 gallon solution tank. The pumps are cULus for indoor and outdoor use; CE IP44 is also available.

The pumps work well for fluid transfer, sampling or injecting a variety of solutions for swimming pools, food & beverage, metal finishing, irrigation and horticulture and more.

- Tube replacement without tools
- Advantages of Stenner peristaltic pumps on Contents page

Automatic Dosing Control for Timed Applications

The Econ T and TD pumps provide automatic injection and offer flexibility to program a customized dosing schedule for light duty applications. Program up to 24 independent On and Off events within a 7 day period. Each event can be set for a specific On and Off time for each selected day or days of the

week. The timer is programmed in hour and minutes increments. A battery is included as backup to power loss to maintain the time and programmed events.

ECON TIMER SERIES

Applications

ECON T

- Biocide feed for Legionella prevention in small cooling towers
- Sanitation for water fountains
- Injection of liquid solar blankets or enzymes for commercial pools
- Injection for scale and algae control in poultry evaporative cool cells
- Disinfection of poultry hatchery dip tanks

ECON TD, Econ TD Battery-Powered

The Econ TD pumps are designed for 5 psi or less and are part of the Econ programmable timer series. Both of the TD pumps offer an FKM tube for d-Limonene. The TD battery-powered model also offers a silicone pump tube for a variety of chemicals; refer to the Chemical Guide in this catalog.

Commercial drain line maintenance, grease trap treatment or odor control are some of the possibilities where automatic injection on a timed dosing schedule can be a necessity.

NOTICE: The information within this chart is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

OEM

Stenner's custom OEM pump can be designed with the customer's supplied motor and gearbox. A standard OEM bracket is provided, or a custom bracket can be designed. The pump is offered with a brushless or brushed DC motor with a choice of either an open or closed version.

Enclosed versions offer an optional internal power supply and customizable power cord for 100-240VAC, 50/60Hz. The customer selects the fixed output from ranges of 0.04 ounces per hour to 2.08 gallons per hour, up to 80 psi maximum (1.3 milliliters per hour to 7.88 liters per hour, up to 5.5 bar maximum).

OEM BATCH

On/Off Switch

The custom OEM batch pump is factory programmed to run a specific length of time when manually activated by an integral switch or can be designed to activate with an input signal. The customer selects the pump run time from 0.1 seconds to 24 hours per activation.

The pre-set fluid volume choices are up to 50 gallons per day, up to 80 psi maximum (189.3 liters per day, up to 5.5 bar maximum). The pump is supplied with a 24VDC brushless motor and a customizable power cord for 100-240VAC, 50/60Hz. The pump can also be supplied without an internal power supply.

Quick Facts

- Up to 8.1 oz/min @ 80 psi max.
- Adjustable potentiometer
- Select custom color
- Optional tube materials
- Dual bearing support output shaft
- Liquid end, gear train & motor are serviceable
- Agency approvals available
- Voltage options

ECON VACCINATOR™

Reliable and Accurate Delivery

The Vaccinator™ delivers 1 gallon of a liquid oral vaccine into the water line consistently over 6 hours.

Injection is directly into the water line, unlike proportioners which require a water bypass.

Direct injection assures accurate dosages to the entire herd and eliminates the need to pre-measure stock solutions, reducing labor costs.

Features

- Patented quick release pump head
- Tube replacement without tools
- Enclosed housing
- On/Off potentiometer
- Indoor/Outdoor
- Optional mounting accessories
- Advantages of Stenner peristaltic pumps on Contents page

Quick Facts

- Injects 1 gallon consistently over 6 hours
- Built-in timer automatically turns off pump
- Simple installation
- Injects directly into water lines
- Eliminates pre-measured stock solutions

THIS TANK IS TESTED AND CERTIFIED BY NSF ACCORDING TO ANSI/NSF 61 FOR CONTACT WITH SOURCE HYPOCHLORITE AND WATER ONLY AND ANSI/NSF 372.

How It Works

Tank Systems include the pump, tank and accessories. Most Tank Systems are shipped pre-assembled to save time on installation. Larger pumps are boxed separately within the tank box.

Go to the specific pump page in this catalog to see if your pump selection is available as a Tank System.

Features

- Pump is vertically mounted for solution containment
- Child resistant lid
- Polyethylene construction is lightweight and rugged

- Rain Roof (Classic Series only)
- Vertical mount over containment basin
- Child Resistant Lid
- Level Indicators

Proportional Metering in a Pre-Assembled System

The Proportional Injection System injects solution in proportion to the system's flow rate based on water volume. The water meter sends a signal to the PCM which actuates the pump. Components are pre-mounted to a heavy duty panel for quick installation and convenient equipment accessibility.

The system is suited for constant pressure (variable speed) well pumps, poultry and livestock houses, irrigation, systems with demand based backup wells and any application with varying flow rates.

Components

- 1 Classic Series Single Head Fixed Output Pump
- 2 PCM
- 3 Plastic 3/4" dry contact water meter, certified by the Water Quality Association to ANSI/NSF 372, low lead
- 4 Flow Indicator to confirm pump is operating
- 5 Filter with 30 and 100 mesh screens
- 6 Unions for easy installation and removal
- 7 Cabinet keeps cords and wires contained
- 8 Heavy duty panel and wall mounting bracket

How It Works

The PCM is a time adjustable controller utilized with the Classic Series Single Head Fixed Output Pump and a pulsing dry contact water meter for applications requiring proportional injection. The water meter sends a signal to the PCM and the PCM actuates the pump to deliver the desired dose based on water volume. The PCM is a component in Stenner's Proportional Injection System.

Proportional Injection System

Features

- Chemical resistant ABS plastic housing
- On-time duration set with knob adjustment with locking feature
- 10' power cord and jacketed signal input cable

Do It Yourself Proportional Feed

Purchase a Classic Series Single Head Fixed Output Pump, a PCM and water meter to create your own proportional feed installation.

Operating Ranges are Interchangeable within Models

The PCM's operating range can be converted by changing the position of the jumpers on the circuit board so another model doesn't have to be purchased.

Weights and Dimensions

Shipping Weight 2.1 lbs (1 kg)

Plastic Water Meter

How It Works

The plastic water meter doesn't require power and utilizes a reed switch to provide a pulsing dry contact signal. The meter is certified by IAPMO to ANSI/NSF 372, low lead.

The 3/4" or 1" meter is included with the Econ Meter Systems. The 3/4" meter is included with the Proportional Injection System. Purchase the meter and other components separately to create your own proportional feed installation.

VPD Water Meter

How It Works

The VPD Water Meter is a vertical positive displacement meter with an oscillating piston. The water meter doesn't require power and utilizes a reed switch to provide a pulsing dry contact signal. Although designed for vertical installation, the meter can be installed horizontally or on an incline, provided the meter remains full of water. The meter has a built-in back flow preventer and is housed in an engineered plastic with a corrosion resistant liquid-sealed register for easy reading.

The VPD Water Meter registers flow rates from 0.1 to 22 gallons per minute. It is ideal for applications with minimal water flow such as early stage poultry flocks and swine nurseries.

* Values for flow switch, observe maximum values of PVC slip fit tee or maximum values of copper pipe.

How It Works

In residential or light commercial applications, water treatment professionals can use a metering pump activated by a flow switch for applications such as disinfection, oxidation or pH adjustment. Stenner offers a dry contact, 2-wire flow switch for a PVC tee or copper pipe. Both are a paddle style with glass fiber reinforced plastic construction. The design uses a magnetic force to reset the paddle to eliminate spring fatigue. Stenner's Econ FP or Econ Integrator™ pumps are designed to interface with a two wire flow switch that accepts a dry contact.

Features

The flow switch for PVC includes a glue-in adapter for easy mounting to a standard PVC slip fit tee. The flow switch for copper has an adapter for soldering to copper pipe. A wiring harness is included with the Econ FP and the Econ Integrator™ for an easy connection to the dry contact flow switch.

The nominal activation points are based on installation into a Spears 3/4" or 1" schedule 80 PVC tee, or an industry standard, smooth 3/4" or 1" copper pipe. The activation points are 1.2 gallons per minute for the 3/4" and 1.9 gallons per minute for the 1" flow switch.

CHEMICAL COMPATIBILITY GUIDE

Ratings Key – Chemical Effect

- A Fluid has minor or no effects
- B Fluid has minor to moderate effects
- C Fluid has severe effects
- No data available

CAUTION

The information is provided ONLY as a guide to assist in determining chemical compatibility for wetted components. Testing under the specific conditions of the application is recommended. Stenner Pump Company assumes no responsibility for its accuracy. Outside factors including but not limited to temperature, pressure, mechanical stress, and solution concentration can affect material compatibility in a particular application. Stenner makes no warranty, expressed or implied, as to the accuracy of this guide or any materials' suitability for fitness or purpose for any application. User assumes all risk and liability for use of this guide.

POLICIES

Limited Warranty

Stenner Pump Company will for a period of one (1) or two (2) years from the date of purchase (proof of purchase required) repair or replace, at our option, all defective parts. Stenner is not responsible for any removal or installation costs. Pump tube assemblies and rubber components are considered perishable and are not covered in this warranty. Pump tube will be replaced each time a pump is in for service, unless otherwise specified. The cost of the pump tube replacement will be the responsibility of the customer. Stenner will incur shipping costs for warranty products shipped from our factory. Any tampering with major components, chemical damage, faulty wiring, weather conditions, water damage, power surges, or products not used with reasonable care and maintained in accordance with the instructions will void the warranty. Stenner limits its liability solely to the cost of the original product. We make no other warranty expressed or implied.

Returns

Stenner offers a 30-day return policy on factory direct purchases. Except as otherwise provided, no merchandise will be accepted for return after 30 days from purchase. To return merchandise at any time, call Stenner at 800.683.2378 for a Return Merchandise Authorization (RMA) number. A 15% restocking fee will be applied. Include a copy of your invoice or packing slip with your return.

Problem with Shipment

Check orders immediately upon arrival. Any claim of damage, shortage or order discrepancy must be noted on the delivery receipt and reported to Stenner at 800.683.2378 within seven (7) days of receipt.

Pump Service & Repairs

Before returning a pump for warranty or repair, remove chemical from pump tube by running water through the tube, and then run the pump dry. Following expiration of the warranty period, Stenner Pump Company will clean and overhaul any Stenner metering pump for a minimum labor charge plus necessary replacement parts and shipping. All metering pumps received for overhaul will be restored to their original condition. The customer will be charged for missing parts unless specific instructions are given. To return merchandise for repair, call Stenner at 800.683.2378 or 904.641.1666 for a Return Merchandise Authorization (RMA) number.

Disclaimer

This information is not intended for specific application purposes. Stenner Pump Company reserves the right to make changes to prices, products, and specifications at any time without prior notice.
